

AS1250 is a conformable double sided acrylic foam tape with a release liner on one side. The product is used for permanent bonding of materials such as metals, glass and some plastics, in interior and exterior applications.

PRODUCT BENEFITS

- Service temperature: -30°C to +150°C continuous, and to +210°C peak (duration 1 hour).
- Complies with Directive 2002/95/EC (RoHS) restricting the use of heavy metals in electronics products.
- Solvent free product.
- Suitable for indoor and outdoor use (excellent UV and ageing resistance).
- Very high resistance to static and dynamic loads.
- Very high adhesion to metals and glass.
- Withstands expansion and contraction of materials without loss of adhesion due to its visco-elastic properties.
